TLS TURFFAN SC 60 TURF COOLER

Portable, affordable and innovative air/water circulation Turf SprayCannon.

The TLS SC 60 generates the very important air movement combined with the throw of very fine water droplets over a large Turf surface, these components are essential for a healthy turf on all sports venues.

TLS SprayCannons have raised the bar on surface aeration. The standard features of the fans include a wheelset, oscillation in three angles, electric power control and easy to use features.

This TLS SC 60 has been specially designed for promoting the healthiest turf through improved air/water circulation, the alleviation of stress and reduction in turf diseases.

The SC 60 Turf Cooler from TLS will easily cool the turf through creating better air/water circulation which will lower the temperatures in order to prevent plant stress/grass diseases.

By using the TLS SC 60 Turf Cooler You will increase the quality of play, especially in closed stadiums.
