## Create a green and beautiful environment

LivePicture® from Mobilane is a living painting using plants which give your living and working environment a green and beautiful atmosphere. This unique sustainable planted system is not only good for the interior climate but also creates a calming affect. Plants have health advantages and contribute to a feeling of well-being, but can take up valuable space. Mobilane has developed Live Picture® to give the benefits without loss of floor space.

Besides the health and the space-saving advantages Live Picture® is also an easily maintained and attractive wall decoration. The planted cassettes can be easily changed in moments, and only need watering every six weeks.

Due to the innovative design LivePicture requires no power source. LivePicture® can be fitted everywhere. The benefits of using LivePicture® include cleaner air, improved humidity, reduce noise pollution, lower stress levels and increase of staff productivity.

## Happier because of plants!

Several studies show that employees feel healthier and happier in a green working environment. The benefit of this is a more productive work force, less sick days, and quicker recovery from stress.

Green is therefore more than just a luxury product, Green is beneficial to health. LivePicture® is aesthetic but also contributes to the health of your employees. An investment which will return a dividend each year.

## Specifications

- » Integrated irrigation system
- » Depth without plants 10.5 cm
- » No electricity needed
- » No pump
- » Can be mounted to every wall

## System

LivePicture® is available in 3 different colours. Inside the frame a plant cassette, in which the plants are installed, is fitted. The plant cassettes can easily be exchanged enabling you to change the plants during the different seasons. LivePicture® is mounted to a wall using only 3 screws.
