

*Carpinus (Hornbeam)*

*Hedera (Ivy)*

*Fagus (Beech)*

## The Benefits

The Green Screen is a very cost effective solution to most sensitive issues. The benefits include:

- Instant security provided by a 5mm weldmesh galvanised high carbon steel security fence
- Instant privacy provided by 65 ivy plants. These are then grown and trained around the uprights (not pinned) to the full height of the screen
- Significantly increases bio-diversity footprint
- Significantly reduces pollution
- Very cost effective
- Very low maintenance
- Extensions to a height of 4m available
- Improves with time
- Maximises the use of space
- 10 year guarantee on the galvanised steel frame
- Expected life of 45 years.

*The Hedera screen as delivered.*
