## Stress Control 15+00+28+2MgO

Itemcode: 4194

### BRAND DESCRIPTION

Sierrablen Plus utilizes the very latest controlled release coating technologies on mini granules for use on a wide variety of turf surfaces from golf tees to sports fields. Sierrablen Plus has been designed for specific growth stages so that nutrients are released at the optimum rate according to plant requirements. The application of a new coating technology guarantees a longer-lasting effect and a fast start. The smaller granule of Sierrablen Plus is distributed better and is easily absorbed. The controlled release technologies in Sierrablen Plus have different release patterns based on Poly-S and Resin coating.

### PRODUCT ADVANTAGES

1. The best preparation for winter gives a full, green sward in spring.
2. Controlled release nitrogen only released in conditions favourable to turf grass growth therefore helping to pre-stress condition the plant..
3. High potassium content strengthens cell walls and aids water regulation in plant.
4. The grass plant is more resistant to extremes of temperature.
5. Magnesium enhances colour and helps mask symptoms of stress.
